

Take control for stress-free and high-quality content production

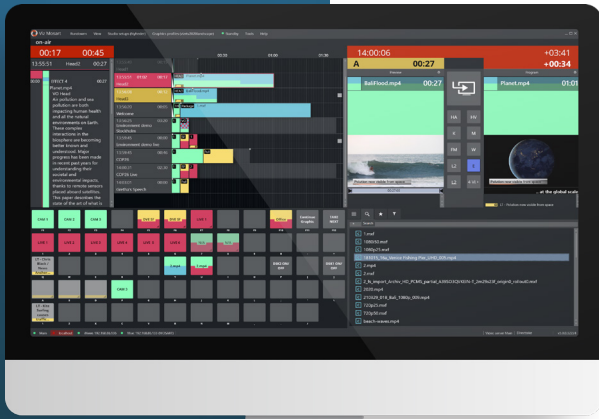

Manually running complex shows is a technical challenge that leaves you open to making mistakes. You need to deal with multiple interfaces across multiple stories, risking content quality and show-to-show consistency.

Viz Mosart provides templated automated control of your studio's devices and systems and a single pane of glass to control your productions from. By automating the technical and repetitive elements of production while still allowing full manual control, you and your team can focus on the content you're producing and **guarantee stress-free, high-quality content production, every time.**

60%

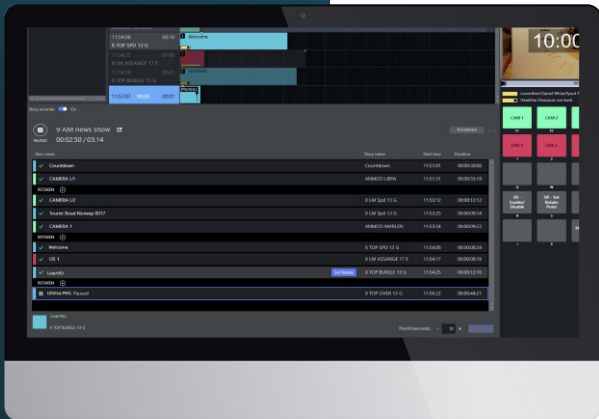

REDUCTION IN ERRORS PER STUDIO

*Average based on feedback from
Viz Mosart customers

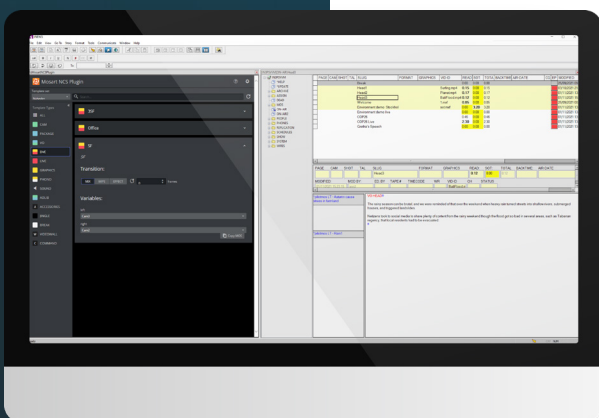

Template complex productions

With Viz Mosart, entire complex productions can be templated for complete consistency from show-to-show, while still allowing full manual control whenever you need it. Fully automated, semi-automated, and manually assisted productions are all possible, including live scripted and unscripted breaking news and pre-recorded content. Multiple production elements like video, graphics, and audio can be easily combined and executed flawlessly with just one button click, **helping to avoid human error and reducing pressure on operators so you can focus on the creation of great stories.**

Stop time for easy retakes

TViz Mosart's Story Recorder feature allows you to stop time and automatically reset studio devices to their previous states, making it incredibly easy and quick to shoot retakes of non-live show segments. When shooting is done, Story Recorder then automatically stitches the correct segments together, removing the tedious basic cuts, **halving the time spent in the editing room!**

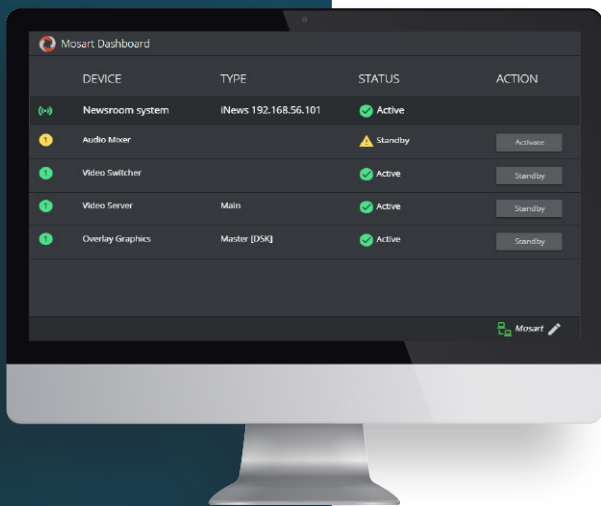

Real-time newsroom connection

With native integrations to all major newsroom computer systems, Viz Mosart makes it easy for you to **view and use the stories created by your journalists from within the same user interface.** Set up your entire show in your NRCS using the Viz Mosart plugin to insert production commands in your stories, add graphics and media objects to your NRCS rundown and view them in the Viz Mosart GUI, and ensure perfectly timed shows with rundown and story durations being transferred seamlessly to Viz Mosart.

Everything you need, at your fingertips

See everything you need and nothing that you don't; by providing a full overview of studio devices and story readiness in a single interface, Viz Mosart gives you a customizable user interface that displays only the relevant information needed for the current show, **removing unnecessary distractions so you can better focus on your content.**

Seamless handover between operators and studios

Viz Mosart **provides seamless handover between operators.** Shows can be managed with reusable automation templates that are sharable between control rooms, and one system can take over from another according to schedule or operator command to execute rundown templates. The same control room can take control of multiple studios with the same profiles and rundowns, studio profiles quickly set up for individual shows, and graphics profiles are instantly switchable to accommodate the look and feel of different shows.

Why Viz Mosart?

1

Easy-to-use:

An intuitive UI that displays only the relevant information for each segment makes Viz Mosart easy for new and experienced users

2

Consistent quality:

Reusable and shareable templates and advanced configuration capabilities ensure you produce consistent shows exactly how you need them, every time

3

Stress-free productions:

Let Viz Mosart take care of the tedious tasks so you can focus on telling better stories, stress-free

Technical capabilities

Focus on delivering great productions with a more flexible control solution and see rapid return on investment with Vizrt's Flexible Access plans with

24/7 support as standard. Fully customizable, Viz Mosart is designed to suit your specific needs, now and in the future.
